 In claim ~~17~~ lines 10-11, delete the term "equal to a ratio of first fiber component weight per unit volume to overall fiber weight per unit volume".

In claim 19, line 4, after "polyethylene", inset - -wherein the second fiber component is different from the first fiber component--.

Patent 5,486,410 teaches a fibrous filter or structure made from bi-component fibers that have the claimed fibers properties of the present invention, and further includes adsorbent particles; the structure is not self-sustaining or self-supported. The claims as amended is limited to have the polyamide component at the outer side or sheath of the core sheath bi-component fiber, which produces polyamide fiber to fiber bonds in a shelf

sustained structure, overcome rejection over Abed, fails to teach the polyamide sheath and the self sustained formed structure.
